

Math News

We finished up Chapter 8 on Friday but I had to leave for a funeral before we had finished. I will be reviewing the lesson on Mixed Numbers and Improper fractions again on Monday before we get started on taking the pretest. The pretest will show us what we might need to review before the test on Tuesday. They should bring home the test along with review pages that they can use to prepare for the test on Tuesday. If we find we need more time I will postpone the test until Wednesday.

Chapter 9 Operations with Fractions

In this chapter, we will be continuing our study of fractions. The children will learn how to add and subtract fractions and mixed numbers with like denominators, and multiply mixed numbers by a whole number.
