

## Math News

### 4th Grade Math

#### Chapter 8: Fractions

The children will be exploring how to model fractions. They will learn how to use benchmark fractions, to compare and order mixed numbers and improper fractions on a numberline, finding equivalent fractions and putting fractions into simplest form.

#### Tentative Schedule:

Review/Pretest on Monday, Mar. 2  
Chapter 7 Test on Tuesday, Mar. 3

### 5th Grade Math

#### Chapter 7: Expressions and Patterns

The children will be learning to: write and evaluate numerical expressions, use the order of operations to evaluate expressions, use numbers and operation symbols to write verbal phrases as numerical expressions, solve problems by working backward, and graph using ordered pairs.

#### Tentative Schedule:

Review/Pretest on Thursday, Mar. 13  
Chapter 7 Test on Friday, Mar. 14

### Chapter 8: Fractions and Decimals

In this chapter the children will learn to: find the Greatest Common Factor and the Least Common Multiple. They will also learn how to compare and simplify fractions and how to write them as a decimal.
