Reminders

Food Drive: Oct 3-13

Each grade level will be assigned a specific item(s)

No School 10/14

Staff In-service

This week in 4th Grade we focused on honoring all of God's creation, completing Math Assessments & ALEKS, brainstorming Genius projects, Balance in art, and Government systems.

This coming week we will be completing Unit 2 in our Math Class. We plan to accomplish having a solid understanding of generalizing place value structures.

In our Religion class, we will learn as a class that Jesus teaches us that God is our loving Father.

Our IB unit of inquiry is government systems and decisions affect equal opportunities and social justice. We will be exploring national and local governments such as native tribes government.

In ELA we have decided to change books to align with our IB unit. In our first novel study, we will be reading Number the Stars. In writing, we are taking small-moment stories and plotting with a story arc to develop their pieces.

In our Art class, we will create projects to demonstrate balance using one of the 3 forms of symmetry.
